**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arthur S. Garrett on 08/14/2008.

The application has been amended as follows:

Claim 5( Amended): The method for evaluating moving image quality of displays according to claims 1 or claim 4, wherein in the step (d), the second blurred edge width corresponds to the difference in pixel number between a position at which the luminance is higher than the minimum luminance by a predetermined threshold ratio or predetermined threshold value and a position at which the luminance is lower than the maximum luminance by a predetermined threshold ratio or predetermined threshold value in a luminance distribution profile focused on the detector surface of the image sensor.

2. The following is an examiner's statement of reasons for allowance: While Igarashi et al (31.2: Proposal of the perceptive parameter motion picture response type) the revised N-BEW parameter, that quantifies the MPRT performance wherein the N-BEW unifies three visual points) The widening of brightness transitions due to a motion (motion blur) (see figure 1), the brightness time response dependence on a brightness level and the brightness level measurement (section 2.1) Yasuhiro et al (JP 6038247) teaches capturing of images of both scrolled and still

test pattern (see figure 3) but the still images in figure 3 are not used to estimate the velocity of the test pattern. None teaches *estimating the moving velocity of the scrolled test pattern based upon the second blurred edge width and the exposure time of the image sensor at which the image of the still test pattern was captured, and normalizing the first blurred edge width by using the estimated moving velocity of the scrolled test* which is identified in each independent claim. The Examiner finds no reason or motivation to combine the above references in an obviousness rejection thus placing the application in condition for allowance.

3. Claims 1-8 are allowed

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NANCY BITAR whose telephone number is (571)270-1041. The examiner can normally be reached on Mon-Fri (7:30a.m. to 5:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jing Wu can be reached on 571-272-7429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
